FAUNISTIC RECORDS FROM THE CZECH REPUBLIC - 78

Coleoptera: Cantharidae

Rhagonycha carpathica Ganglbauer, 1896. Moravia, Bílé Karpaty Mts., Mt. Velká Javořina (7172), 5.-8.vi.1997, 5 ♂♂, 1 ♀, J. Rolčík lgt., V. Švihla det. et coll. Hitherto known only from Slovakia and Transcarpathian Ukraine (Dahlgren 1968), new species for the Czech Republic. In the check-list of Cantharidae (Švihla 1993) it was included as a synonym of *Rhagonycha morio* Kiesenwetter, 1851, described and hitherto known only from the Pyrenees. Later it was found (Švihla 1995) that these two species are both valid, though closely related. Thus *R. morio* has to be excluded from the fauna of the Central Europe.
