FAUNISTIC RECORDS FROM THE CZECH REPUBLIC – 152

Coleoptera: Byrrhidae

Byrrhinae

Carpatobyrrhulus tatricus Mroczkowski, 1957. Moravia or., Vizovické vrchy hills, Vizovice (6773), 20.iii.1966, 1 ♀, K. Majer leg., M. Boukal det., coll. Moravian Museum in Brno. Known from Poland (Mroczkowski 1957) and Slovakia (Boukal & Trávníček 1998) as endemic from the Tatras and surrounding mountains. In these mountains, specimens were collected in moss on bases of rocks and examination of their gut content revealed that they fed on *Pohlia* sp., *Polytrichum* sp. and *Polytrichum* cf. *longisetum* mosses (all mosses Z. Hradílek det.). New species for the Czech Republic.

Syncalyptinae

Curimopsis austriaca Franz, 1967. Moravia bor.: Budišovice (6174), 4.x.1996, 1♂, M. Mantič det.; Hlučín-Bobrovníky (6175), 7.x.2001, 29 ♂♂ by sifting of mosses on bases of oak trees (*Quercus* sp.); ditto, 12.x.2001, 17♂♂ by sifting of mosses and leaves in oak forest (*Quercus* sp.), all M. Mantič (Hlučín-Bobrovníky) leg. and coll.; Moravia centr.: Moravičany (6267), 2.iv.1989, 1♂, R. Fornůsek leg., coll. J. Schneider (Praha); Smilov (6370), 8.-29.vii.1991, pitfall trap, 1♂, M. Bocáková leg., coll. Regional Museum in Olomouc; Moravia or., Štramberk, Kotouč hill (6474), 13.ix.1997, 1♂ by sifting of mosses on limestone rock, J. Vávra leg., det. and coll.; ditto, 16.ix.1997, 2 ♂♂, M. Mantič leg., coll. M. Mantič and J. Schneider. All specimens M. Boukal det. or revid. Known from southern and central Europe, recorded from France, Germany, Austria, Switzerland, Italy and Croatia (Franz 1963, Paulus 1979, Allemand 1991, Angelini et al. 1995). In the Check-list of Czechoslovak beetles reported without further details from Slovakia, and from the Czech Republic only from Bohemia (Bílý 1993). However, the type series contains one very old male specimen from Moravia (Franz 1967): "Mähren: Mährisch-Weißkirchen [= Hranice na Moravě (6472)]", Schuler leg., coll. Natural History Museum in Wien. Correction of the Check-list and confirmation of the occurrence in Moravia.

Note. Due to their extremely difficult identification within the genus, females collected along with males of *C. austriaca* at the listed localities are not given here.

Curimopsis nigrita (Palm, 1934). Moravia mer. or., Brumov (6974), 1936, 1 ♂, Zeiler leg., M. Boukal det., coll. Moravian Museum in Brno. Tyrphobiont species, known from northern and central Europe and northern Italy (Palm 1934, Burakowski et al. 1983, Angelini et al. 1995). Buckland & Johnson (1983) reported fossilized specimens from moors in England. In central Europe recorded from Germany and Poland (Paulus 1979, Burakowski et al. 1983, Mroczkowski 1958). New species for the Czech Republic.
