Only two papers have so far reported precise data of this species from Bohemia: Obenberger (1910) and Bechyně (1944). It has been published from Moravia several times (e. g. Bechyně 1944, Horsák et al. 2001) but it was omitted in the Check-list by Strejček (1993). Therefore, recent records from Bohemia and Moravia are presented. The specimens from Choťovice are the first records from Bohemia after 60 years; correction of the Check-list.

As in the preceding species, *H. subferruginea* was omitted in the Check-list by Strejček (1993). Additional records from Bohemia and Moravia are presented; correction of the Check-list.
