FAUNISTIC RECORDS FROM THE CZECH REPUBLIC – 196

Coleoptera: Cerambycidae: Lamiinae

Anoplophora glabripennis (Motschulsky, 1853). Moravia bor., Frýdek-Místek env., Lysůvky (6375), 1.vii.2004, 1 ♀ found sitting on the trunk of a maple tree (*Acer* sp.) imported to the Czech Republic from the Netherlands and growing in a garden centre, with larvae and emergence holes, D. Lančová lgt., L. Dembický & O. Sabol det., M. Rejzek revid., coll. Z. Nedorost (Fryčovice). Distributed in China and Korea (Lingafelter & Hoebeke 2002), imported to Japan, USA, Canada (Allen & Humble 2002, Haack et al. 1997, Takahashi & Ito 2005) and Europe. In Europe imported to Great Britain, France, Austria, Germany and Poland (Białooki 2003, Cocquempot et al. 2003, Hérard et al. 2005, Krehan 2003, Lewis 1999). Into some countries (Austria, Germany, USA), the species has been imported with wooden packing material from China (Krehan 2003, Hérard et al. 2005). It is a polyphagous species attacking a variety of broadleaved trees, in many countries considered as a serious pest of timber (Li & Wu 1993, Lingafelter & Hoebeke 2002). New adventive species for the Czech Republic.
