Faunistics, Coleoptera, Dermestidae, *Anthrenus flavipes*, Slovakia

Abstract. The dermestid beetle *Anthrenus* (*Anthrenus*) *flavipes flavipes* Le Conte, 1854 is recorded for the first time from Slovakia.

More than 1400 species of Dermestidae (Coleoptera) are known worldwide, with 47 known from Slovakia (Háva 2011), including 8 species of the genus *Anthrenus* Geoffroy, 1762. In the present work an additional species of *Anthrenus*, *Anthrenus* (*Anthrenus*) *flavipes flavipes* Le Conte, 1854, is recorded from Slovakia.

Material examined. Slovakia, Žilina – centrum (6878), 10.v.2012, 6 spec., on flowers, J. Vodrážka leg., J. Háva det. et coll.

Anthrenus (*Anthrenus*) *flavipes flavipes* Le Conte, 1854 is an almost cosmopolitan, generally synanthropic species (Háva 2011). A pest of various animal materials, it has also been known to damage vegetable products (Peacock 1993). In the Czech Republic it has only been recorded from two localities in Bohemia (Háva 2011). New species for the fauna of Slovakia.

ACKNOWLEDGEMENTS. I am very grateful to J. Vodrážka (Praha, Czech Republic) for providing me with interesting material and to J. Růžička (Praha, Czech Republic) for comments on the manuscript. The research was supported by the Internal Grant Agency (IGA no. 20124364), Faculty of Forestry and Wood Sciences, Czech University of Life Sciences Prague.

SOUHRN

Ze Slovenska je v nejnovějším checklistu uvedeno 8 druhů z rodu *Anthrenus* Geoffroy, 1762 (Háva 2011). Zde předkládaný nález *Anthrenus* (*Anthrenus*) *flavipes flavipes* Le Conte, 1854 představuje první údaj tohoto druhu ze Slovenska.
