FAUNISTIC RECORDS FROM THE CZECH REPUBLIC – 357

Coleoptera: Leiodidae: Leiodinae

Agathidium (***Neoceble***) ***nudum*** C. Hampe, 1871. Moravia or., Bílé Karpaty Mts., Vlárský průsmyk pass, Svatý Štěpán env., Okrouhlá Nature Monument (6974), 11.ix.2011, 1 ♀, O. Konvička lgt. et coll., Z. Švec det. According to Perreau (2004), the species is known from Azerbaijan, Austria, Bosnia and Herzegovina, Croatia, Czech Republic, France, Georgia, Hungary, Italy, Montenegro, Romania, Serbia, Slovakia and Slovenia. According to Michel Perreau (Paris, France) (pers. comm.) the record from the Czech Republic is from "Cecoslovacchia: Jelenec (TMB)" (assumed from Angelini 1995). The specimen cited by Angelini (1995) is preserved in the Hungarian Natural History Museum in Budapest, and has not been examined. It is not clear if "Jelenec" in "Cecoslovacchia" refers to a locality in the Czech Republic or in Slovakia. The first concrete record from the Czech Republic.

ACKNOWLEDGEMENTS. We would like to thank M. Perreau for information, J. Vávra (Ostrava, Czech Republic) and J. Růžička (Praha, Czech Republic) for critical comments on the manuscript and M. V. L. Barclay (London, Great Britain) for correction of the English.
