FAUNISTIC RECORDS FROM THE CZECH REPUBLIC – 406

Lepidoptera: Lycaenidae

Cacyreus marshalli Butler, 1898. Moravia bor., Ostrava-Poruba (6174), 24.vii.2015, 1 ♀, in a garden with *Pelargonium* cultivars, J. Novák leg., det. et coll., J. Beneš revid. This South African species was introduced to Mallorca in the late 1980s. Recently, it has rapidly expanded in the southern coast of Europe from Portugal to Greece. Single records of introduced individuals are also documented from England, Netherlands, Belgium, Denmark, Sweden and central Europe (Austria, Germany and Switzerland), where the species cannot survive the winter, but may persist in greenhouses. In Europe caterpillars feed on *Pelargonium* spp. (Kudrna et al. 2015, Tolman & Lewington 1997, Verovnik et al. 2013). First record of species for the Czech Republic.

KUDRNA O., PENNERSTORFER J. & LUX K. 2015: *Distribution Atlas of European Butterflies and Skippers*. Peks, Schwanfeld, 650 pp. – TOLMAN T. & LEWINGTON R. 1997: *Collins Field Guide Butterflies of Britain and Europe*, HarperCollins, London, 320 pp. – VEROVNIK R., WIEMERS M. & VLIEGENTHART A. 2013: Fauna Europaea: Lycaenidae. In: KARSHOLT O. & NIEUKERKEN E. J. van (eds): *Fauna Europaea: Lepidoptera, Moths.* Fauna Europaea, version 2.6, http://www.faunaeur.org (accessed 15 February 2016).
