FAUNISTIC RECORDS FROM THE CZECH REPUBLIC – 454

Coleoptera: Eucnemidae

Clypeorhagus clypeatus (Hampe, 1850). Moravia bor., Moravičany env., Doubrava Nature Reserve (6267), 3.vi.–2.vii.2017, 1 ♀; 2.vii.–4.viii.2017, 1 ♀; both specimens from a window trap on the dead trunk of an old beech (*Fagus sylvatica*), O. Nakládal leg., det. et coll., J. Vávra revid.

West Palaearctic species known from Bosnia and Herzegovina, Estonia, Hungary, Latvia, Poland, Romania, Russia (Central European Territory and Far East), Slovakia, Ukraine (Mertlik et al. 2007, 2009, Muona 2007, Süda 2016), and probably erroneously also from Germany (Muona 2007). In the Czech Republic, Fleischer (1927–1930) reported it from "Moravia" with incomplete data, and two records (Ostrý Mt. in Moravskoslezské Beskydy Mts. and Nýdek near Třinec) were published by Mertlik (2008), without examining specimens, based on a personal communication from Petr Nohel (Praha, Czech Republic). First reliable record from the Czech Republic.

ACKNOWLEDGEMENTS. We are obliged to Tereza Beránková (Kostelec nad Černými lesy, Czech Republic), Jiří Brestovanský (Neratovice, Czech Republic) and Jiří Synek (Zdice, Czech Republic) for sorting of entomological material from window traps, and J. Růžička (Praha, Czech Republic) for valuable comments on the manuscript. M. V. L. Barclay (London, Great Britain) is acknowledged for revision of the English. This study was funded by the grant NAZV KUS QJ1520197 Environmental Resistance of stable Forest stands fulfilling non-wood producing roles.
