FAUNISTIC RECORDS FROM THE CZECH REPUBLIC – 465

Coleoptera: Mycetophagidae

Berginus tamarisci Wollaston, 1854. Bohemia centr.: Praha-Letná (5952), 23.vii.2018, 2 spec., beaten from dry branches of *Pinus* sp. and *Picea pungens*, J. Synek & O. Nakládal lgt., O. Nakládal det. et coll., J. Vávra revid.

Widespread throughout the Mediterranean, published also from North Africa and Asia Minor; in the north, reported as an introduced species from Great Britain (Allen & Booth 2008) and Sweden (Nikitsky 2008). In central Europe known from Austria, Czech Republic, Germany, Hungary, Poland (introduced), Slovakia and Switzerland (Nikitsky 2008, Jäch et al. 2013). From the Czech Republic reported without precise data in the Catalogue of Palaearctic Coleoptera by Nikitsky (2008), and recently recorded with precise data from southern Moravia: Havraníky and Znojmo by Vávra et al. (2017). First precise record from Bohemia.

ACKNOWLEDGEMENTS. This study was supported by the grant NAZV KUS QJ1520197 Environmental resistance of stable forest stands fulfilling the non-wood-producing roles. We are obliged to Jiří Ch. Vávra (Ostrava, Czech Republic) for critical remarks.
