FAUNISTIC RECORDS FROM THE CZECH REPUBLIC – 480

Coleoptera: Chrysomelidae

Xanthogaleruca luteola (Müller, 1766). Moravia mer., Pálava Protected Landscape Area, Mušlov, sandpit (7266), 24.iv.2018, 5 spec., F. Trnka leg., det. et coll. All specimens were beaten from various broadleaf trees such as *Quercus*, *Ulmus* and *Populus*.

Widespread species known from most of Europe, from Spain to Ukraine (excluding Northern Europe), North Africa, and the Near and Middle East (Beenen 2010). This species has records from Bohemia in the historical literature (Kliment 1899, Roubal 1952) and was recently rediscovered in western Bohemia (Týr 2019). There are specimens from Moravia from before 1960 in the Fleischer collection in the National museum in Prague, labelled as Lednice and "Moravia" (J. Bezděk, pers. comm.). Recent occurrence in Moravia confirmed.

ACKNOWLEDGEMENTS. Many thanks to Jan Bezděk (Brno, Czech Republic) for providing relevant literature and records from the Fleischer collection. The study was supported by the project "Monitoring a mapování vybraných druhů rostlin a živočichů a inventarizace maloplošných zvláště chráněných území v národně významných územích v České republice" realised by AOPK ČR (register number of project EIS: CZ.05.4.27/0.0/0.0/17_078/0005239).

BEENEN R. 2010: Galerucina. Pp. 443–490. In: LÖBL I. & SMETANA A. (eds): *Catalogue of Palearctic Coleoptera 6, Chrysomeloidea*. Apollo Books, Stenstrup, 924 pp.

KLIMENT J. 1899: Čeští brouci. [*Czech beetles*]. F. Riedl, Německý Brod, 811 pp. (in Czech).
