Most specimens were collected on the ground or on *Erodium cicutarium*, which is the only host plant of this species (Stejskal et al. 2014).

Widespread species known from North Africa, most of Europe and a large part of Asia to western Siberia (Alonso-Zarazaga et al. 2017). From the Czech Republic, it is known only from records almost a hundred years old from Bohemia, and the most recent records from Moravia (Znojmo and Pavlov surroundings) are from the 1970s (Stejskal & Trnka 2013). Recent occurrence in Moravia is confirmed after more than 40 years.

ACKNOWLEDGEMENTS. Many thanks to Radek Láska (Uherský Brod, Czech Republic) and Jaroslav Tvrdoň (Kunovice, Czech Republic) for their faunistic data. Part of the study (FT) was supported by the project "Monitoring a mapování vybraných druhů rostlin a živočichů a inventarizace maloplošných zvláště chráněných území v národně významných územích v České republice" realised by AOPK ČR (register number of project EIS: CZ.05.4.27/0.0/0.0/17_078/0005239).
