FAUNISTIC RECORDS FROM THE CZECH REPUBLIC – 500

Lepidoptera:

Psychidae

Whittleia schwingenschussi (Rebel, 1910). Moravia mer., Kurdějov (7066), 2.iv.2011, 2 ♂♂, 3.iv.2011, 6 ♂♂, 4.iv.2011, 1 ♂, all J. Uřičář leg., det. et coll., 2.iv.2011, 3 ♂♂, P. Potocký leg., det. et coll. (Fig. 1), all specimens flying in full sunshine.

Rare and insufficiently known species, recorded only from Lower Austria (Rebel 1910, Sterzl 1967, Sauter & Hättenschwiller 1996, Arnscheid & Weidlich 2017). The taxon was described by Rebel (1910) as a variety of *W. undulella* (Fischer von Röslerstamm, 1837), later it was upgraded by Forster & Wohlfahrt (1960) to a separate species. New species for the Czech Republic.

Noctuidae

Agrochola ruticilla (Esper, 1791). Moravia mer., Břeclav env., Lanžhot (7367), 7.iv.2018, 1 ♀, J. Uřičář leg., det. et coll., 21.iv.2018, 1 ♀, P. Potocký leg., det. et coll. (Fig. 2).

Western Mediterranean species, distributed in northern Africa, western and central Europe except Great Britain (Ronkay et al. 2001). It is known from all neighbouring countries (Skule & Fibiger 2013), but only old records are known from Poland (Buszko & Nowacki 2017) and Austria (Huemer 2013). In the Czech Republic known only two undocumented and unreliable records from Bohemia: Praha-Krč 1906 (Sterneck 1929) and Moravia: surroundings of Brno from the beginning of the 20th century (Doleschall 1909). The first reliable record from the Czech Republic.

Orbona fragariae (Vieweg, 1790). Moravia mer., Břeclav env., Lanžhot (7367), 4.iv.2019, 1 ♀, J. Uřičář leg., det. et coll. (Fig. 3).

Eurosiberian species, in Europe locally distributed in central and eastern parts, recorded in all neighbouring countries (Ronkay et al. 2001, Skule & Fibiger 2013), but only old records are known from Poland (Buszko & Nowacki 2017). In the Czech Republic known only from one undocumented and unreliable record from Brno from the late 19th or early 20th century (Doleschall 1909). The first reliable record from the Czech Republic.

ACKNOWLEDGEMENTS. We are grateful to Dr. Sabine Gaal-Haszler (Lepidoptera Sammlung, Museum of Natural History of Vienna, Austria), for information and especially for the photographs of the type material of *Whittleia schwingenschussi*. We would also like to thank Professor Zdeněk Laštůvka (Brno, Czech Republic) for the photograph of *Orbona fragariae* and for his all-round help.
