Coleoptera, Cleridae, *Allonyx quadrimaculatus*, Albania, faunistics

Abstract. *Allonyx quadrimaculatus* (Schaller, 1783) is reported for the first time from Albania.

Allonyx quadrimaculatus (Schaller, 1783) has so far been recorded from Austria, Belgium, Croatia, Cyprus, Czech Republic, France, Germany, Greece, Hungary, Italy, Macedonia, Netherlands, Poland, Portugal, Slovakia, Spain, Switzerland and Turkey (Löbl et al. 2007), Romania (Kurzeluk 2012) and the European part of Russia (Ruchin & Egorov 2018). The species is in general considered rare, and its occurrence is sporadic and fragmented.

Here, I report *Allonyx quadrimaculatus* for the first time from Albania: Albania mer., 5 km NE of Leskovik village, 40°10′33.66″N 20°38′49.52″E, 12.v.2013, 2 ♂♂, under bark of *Pinus* sp. in a wood stack (Fig. 1), J. Habarta leg., det. et coll.

ACKNOWLEDGEMENTS. I thank Adam Šíma (Brandýs nad Labem-Stará Boleslav, Czech Republic) for valuable comments on the manuscript and a photograph of the habitat, and Maxwell V. L. Barclay (London, United Kingdom) for revision of English.
