Faunistics, Coleoptera, Cryptophagiae, *Alfieriella naxiana*, Albania

Abstract. The first record of *Alfieriella naxiana* Reitter, 1884 from Albania is presented.

Five species of the genus *Alfieriella* Wittmer, 1935 have been described so far (Chen et al. 2020). One species, *A. naxiana* Reitter, 1884, is distributed in southern and south-eastern Europe. Based on information given by Johnson et al. (2007), the distribution of *A. naxiana* comprises Greece and Italy. More precise distributional data was given by Poggi (2020). Here, I report this species for the first time from Albania: Albania mer., Qeparo village env., 30 m a.s.l., 40°03′06.56″N 19°48′16.16″E, 14.v.2016, 1 ♂ (dissected, Figs. 2–3), sifting leaf litter and debris under *Euphorbia dendroides* (Fig. 1).

ACKNOWLEDGEMENT. I thank Jan Růžička (Praha, Czech Republic) for valuable comments on the manuscript, as well as pictures of the specimen. My thanks also go to Maxwell V. L. Barclay (London, United Kingdom) for revision of English.

SOUHRN

Druh *Alfieriella naxiana* Reitter, 1884 byl dosud zaznamenán pouze z Řecka a jihu Itálie (Johnson et al. 2007, Chen et al. 2020, Poggi 2020). V příspěvku uvádím první nález tohoto druhu z jižní Albánie.
