
FAUNISTIC RECORDS FROM THE CZECH REPUBLIC – 524

Coleoptera: Dasytidae

Ondřej KONVIČKA

Kúty 1959, CZ-760 01 Zlín, Czech Republic;
e-mail: brouk.vsetin@centrum.cz

Danacea marginata (Küster, 1851). Moravia mer. or., Bílé Karpaty Protected Landscape Area: Strání env., Hrnčárky Nature Monument (7072), 440–485 m a.s.l., 23.vi.2022, 1 spec., O. Konvička lgt., det. et coll.; Strání env., Nové louky Nature Monument (7072), 505–560 m a.s.l., 23.vi.2022, 1 spec., O. Konvička lgt., det. et coll. Both specimens were found by sweeping vegetation.

Western Palaearctic species known from Albania, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Greece, Hungary, Italy, Macedonia, Serbia and Montenegro, Slovakia, Slovenia, Syria, Turkey (Mayor 2004), and also from Romania and Russia: Caucasus (Liberti 2009). New species for the Czech Republic.

ACKNOWLEDGEMENTS. I would like to thank J. Vávra (Ostrava, Czech Republic) for critical comments on the manuscript and M. V. L. Barclay (London, United Kingdom) for correction of the English. The work is part of the project 'Monitoring and mapping of selected plant and animal species and inventories of small scale protected areas in the Czech Republic' organized by the Nature Conservation Agency of the Czech Republic. EIS project registration number: CZ.05.4.27/0.0/0.0/17_078/0005239.
