Clypeorhagus clypeatus (Hampe, 1850). Bohemia centr., Jevany env., Voděradské bučiny National Nature Reserve (6054), 49°57'32.6"N 14°48'25.2"E, 19.vii.–6.viii.2021, 1 ♀, in window trap in old beech (*Fagus sylvatica*) forest, V. Zumr lgt., O. Nakládal det. et coll.

West Palaearctic species known from Bosnia and Herzegovina, Estonia, Hungary, Latvia, Poland, Romania, Russia (Central European Territory and Far East), Slovakia, and Ukraine (Mertlik et al. 2007, 2009, Muona 2007, Süda 2016). Also reported, probably erroneously, from Germany (Muona 2007). In the Czech Republic known from Moravia. Fleischer (1927–1930) reported this species from “Moravia” without further data, Mertlik (2008) published two unreliable records from Moravskoslezské Beskydy Mts. (see Nakládal & Vávra 2018), and finally Nakládal & Vávra (2018) reported recent occurrence from Doubrava Nature Reserve near Moravičany. New species for Bohemia.

ACKNOWLEDGEMENTS. We are obliged to J. Růžička (Czech University of Life Sciences Prague, Praha, Czech Republic), David Sommer (Charles University, Praha, Czech Republic), Josef Mertlik (Opatovice nad Labem, Czech Republic) and Jiří Vávra (Ostrava Museum, Ostrava, Czech Republic) for valuable comments on the manuscript. M. V. L. Barclay (Natural History Museum, London, United Kingdom) is acknowledged for revision of the English.
