**Faunistics, Coleoptera, Cryptophagidae, *Cryptophagus falcozi*, Czech Republic, Spain**

**Abstract.** The known data on *Cryptophagus falcozi* Roubal, 1927 from the Czech Republic is summarised, and the first record for Spain is presented.

*Cryptophagus falcozi* Roubal, 1927 is so far known from only a few countries in Europe. Johnson et al. (2007) and Otero (2013) reported it from Denmark, Estonia, Great Britain, Italy, Slovakia and Slovenia, and Ochoretna (2019) added a record from Ukraine. Only three records are known from the Czech Republic, in Bohemia from the Šumava National Park (Procházka 2020), and in Moravia from the Moravskoslezské Beskydy Mountains (Schlaghamerský & Průdek 2010).

Taxonomic characters for this species are given in the description by Roubal (1927), later specified by Coombs & Woodroffe (1962). Reška (1994) included it in his key to Central European species of the genus *Cryptophagus* Herbst, 1792, where he illustrated its distinctive characters. His work was followed in similar more recent papers, such as Lyubarsky (2002) and Otero (2013).

I here present an additional record from the Czech Republic, and the first record for Spain.

**Material examined. Czech Republic**: Bohemia occ., Kraslice env., Rotava – Bystřina valley (5641), 3.vii.2020, 3 spec., J. Pávek leg. et coll. **Spain**: Altsasu env., Puerto de Urbasa, 42°50′N 02°10′W, 920 m, 14.vii.2006, 2 spec., T. Gazurek leg. et coll. All specimens P. Průdek det.

ACKNOWLEDGEMENTS. I am grateful to Tomasz Gazurek (Warszawa, Poland) and Jiří Pávek (Plzeň, Czech Republic) for the loan of specimens from their collections. I also thank J. C. Otero (Santiago de Compostela, Spain) for valuable information.
