FAUNISTIC RECORDS FROM THE CZECH REPUBLIC - 11

Coleoptera: Scarabaeidae

Pentodon idiota (Herbst, 1789). [Moravia mer.], Lednice (71-7266), 12.vi.1963, 1 spec., leg. [F.] Lelláková, det. D. Král et J. Vitner, coll. Department of Zoology, Charles University (Prague). According to personal communication by Dr. Františka Lelláková this specimen was found during the field trip with students of Charles University held in the vicinity of Lednice, probably near the fishpond Nesyt (7266). Pontomediterranean species, in central Europe known from Hungary (Endrödi 1956, 1969; Horion, 1958), Austria (Burgenland, Niederösterreich) (Horion 1958) and Slovakia. From the territory of Slovakia recorded by Roubal (1936) from Košice, by Balthasar (1956) from Kováčovské kopce [hills near Štúrovo] and by Endrödi (1969) from Kassa [=Košice] (deposited in coll. Endrödi in Hungarian National Museum, Budapest). Recently (1983-1990) this species has been repeatedly collected in western part of Slovakia (Kamenín, Kamenný Most, Palárikovo, Tvrdošovce) where saline places such as meadows and pastures are probably its preferred habitat (Král & Souček 1987, Král & Vitner 1993). First record from the Czech Republic.
